**Hiring Team
SAP Labs Singapore**

Dear SAP Hiring Manager,

Application for the Post of Associate AI Developer – Requisition ID: 402837

I'm Grey, a recent graduate from Nanyang Polytechnic . I am Writing to express my interest in the Associate AI Developer Role Requisition ID: 402837. My interest in artificial intelligence began with my discovery of Natural Language Processing. I was intrigued by how machines can process and generate complex human languages. This sparked my curiosity in AI programs, motivating me to pursue AI development professionally. As a recent graduate with a Diploma in Game Development & Technology, I have experience with cloud-based development, programming in C++ , C# and Java. With my skill set I am enthusiastic about contributing to SAP's mission to build intelligent, scalable, and cloud-ready AI solutions.

During my time at Nanyang, I have involved myself with projects involving object-oriented programming, algorithm design, and backend services deployed on cloud platforms. For example, I developed core gameplay logic for my mobile rhythm game in Android Studio, where I built a real-time event scheduler to spawn and manage note objects based on timestamps. Separately I have also used Amazon Web Services(AWS) to manage user data in a project. I believe such experience will benefit me when working on enterprise level AI projects.

I believe my background in programming and interests will make me a good candidate for this role. I am also drawn to SAP's purpose driven innovation and its global impact through AI. My resume is also attached below for your review. I would appreciate the opportunity to further discuss how I can support the team at SAP. I would appreciate the chance to attend a personal interview and demonstrate how my skills can support your company's initiatives. You can reach me at +65 9644 2858 or grey.chay@yahoo.com.sg. I look forward to your respond to my cover letter.

Sincerely,

Grey Chay
